

AquaKAT®

Vitalized and structured water

The AquaKat brings the water particles to vibrate and stimulates a vortex movement, the particles structure themselves and regain the properties of natural and fresh spring water. This vitalization will bring you advantages for home, in animal husbandry, plant cultivation and industry.

with the impulse of nature

- Maintenance-free
- Works without chemicals
- Reduction use of additives
- Improved field spraying
- No impairment of the water pipes
- Higher water consumption

penergetic 
the natural biotechnology

CE

... for intelligent
agriculture

**The AquaKat is easy to install.
No plumbing is required.**

The AquaKat can be mounted on all pipe materials except lead. No intervention in the pipe network is necessary. External factors have an influence on the AquaKat. Please ask your local distributor for advice.

Ideally, an AquaKat should be placed on to the water line close to where it first comes into the dwelling or premises it is intended to service.

IMPORTANT
minerals remain in the water

INSTALLATION
without cutting water pipes

VITALIZED
and structured water

AquaKAT
VITALIZED AND STRUCTURED WATER

NO
maintenance costs

LESS
problems with lime and rust buildup

Conductor condition after three months of operation without and with AquaKat.

Installation of AquaKat in a dairy farm
Resulted in more water consumption of the animals and an increased milk production.
